

# Ensure your message always gets out.

## Audio Broadcast from Intermedia

Audio Broadcast from Intermedia gives you the ability to broadcast a message to readily available FM radio receivers in addition to your public address system, overhead paging system and phone lines, all from one source.

### Ideal for routine messaging

With Audio Broadcast from Intermedia you can broadcast pre-recorded music, messages, promotions, information, updates and programs.

### Ideal for emergency messaging

During an emergency situation, you can't be 100% sure that staff members will remain calm and able to deliver critical directions live over a public address system or radio network. You can't count on your internal communications system not overloading or going off line either. Pre-recording emergency instructions on the Audio Broadcast system is the reliable alternative.

### Save time and money: manage your own messaging

Audio Broadcast from Intermedia saves you valuable time because, unlike most other products, you don't require a third party to create your messaging. Audio Broadcast gives you the ability to do it yourself—in real time. It's as simple as:

- Access the system via network or phone connection
- Record or select a pre-recorded message or playlist
- Activate

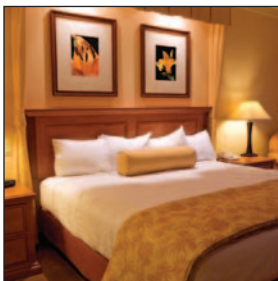

*It's the message that matters.*

## The perfect messaging solution for a multitude of markets

- **Manufacturing:** broadcast routine, test drills and emergency messaging to all security personnel, with separate public messaging within a large geographic area.

- **Retail:** broadcast consistent branding and promotional information with standalone and centralized site management of PA, radio and telecommunications systems.

- **Hospitality:** broadcasting of audio concierge, promotional information, advertising and local attractions and restaurant information via in-room FM radio, in-house audio systems and telecommunications facilities.

- **Campuses:** broadcast meetings, lectures and events via radio and public address for coverage and to meet ADA requirements. Informational and emergency broadcast via PA, visual display and radio to students, visitors and staff.

- **K-12 Education:** broadcast parent and student information via radio and PA, emergency information, and sporting & meeting events.

- **Military Bases:** communicate base closure, mass notification and force mobilization information broadcasting via PA, radio, telecom information lines and call center queuing.

- **Government:** broadcast weather, traffic and public information to aviators, commuters, visitors and tourists for routine and emergency incident management.
