

Automatic Terminal Information System (ATIS) XMU+

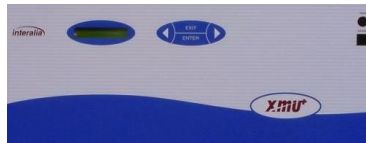

OPTIMIZE YOUR TERMINAL INFORMATION SYSTEM

Interalia's Automatic Terminal Information System (ATIS) is an audio recording system used at airports to transmit repetitive information such as: wind speed, visibility, air temperature, runway availability, wind direction and runway conditions to be updated as often as required, then broadcasted 24 hours-a-day.

ATIS XMU+ BENEFITS

- Flexible information access via
 - Control tower radio transmitter channel
 - Telephone call in
- Broadcast options
 - Push to Talk (radio transmitter)
 - Continuous
- Scalable
 - 4 – 32 Tx outputs
 - 8 – 64 telephone in ports
- Flexibility to record messages
 - Locally - Ring down circuit, front panel handset
 - Remotely - Remote port (telephone line), Network port
- Flexible programming options
 - Remote - XMUCOM+ Administration software
 - Local – Front panel
- Record messages without interrupting the broadcast
- Messages retained even if power failure occurs
- Reliability – redundant hot swap power supplies

Technical Specifications

Audio Storage:

- 1 to 6 hours of recording time
- .wav file format
- 8 bit compression/8K sampling rate
- Mono sound
- CCITT μ -Law Format

Communication Ports:

- 1 Front panel handset port: 220 ohms
- 1 Remote access phone port (RJ-11)
- 1 Network port (RJ-45)
- 1 Modem port

Messages:

- 999 messages per partition/64 partitions

Power Supply:

- 110/240 VAC, 1.0/0.5 A, 60/50 Hz, 120 W
- -48 VDC, 2.5 A, 120 W

Approvals:

- FCC, CS-03, CSA/US, CE, A-Tick

Dimensions:

- 7 in. (17.5 cm) H x 17.5 in. (44 cm) W x 12 in. (31 cm) D

XMUCOM+ Administration Software:

- Windows XP or Win7

Message Manager: (Optional)

- Windows XP or Win7
- Sound Card
