

iMCM™

Interalia Multisite Content Manager

Managing & broadcasting music and messages remotely has never been easier.

Interalia's iMCM (Multi-site Content Manager) for iProMOH, allows companies with multiple locations to easily create and manage recorded announcements, music-on-hold and on-site music & messaging. iMCM simplifies messaging across geographies, time zones and demographics to multiple end points. The iMCM hierarchical file management system allows managers to apply content and schedules to global, regional or local play lists, eliminating the need to manually replicate schedules, music or messages for each location.

iMCM™ Features:

- Time and date message scheduling capabilities
- Priority message scheduling
- Copy & paste schedules, groups or entire configurations
- Update single, multiple or all iProMOH's from a central location
- Intuitive folder structure similar to Microsoft Windows
- Allow secure web access to user specific folders
- Flexible scheduling of iProMOH check-in / update times
- Application activity logging and notifications
- Detailed schedule reporting
- Bulk audio uploads

Each managed site requires
qty: 1 P/N: 42000

Media Storage

- 11GB

Audio Inputs:

- Analog
- Network
 - Ethernet
 - Wifi

Audio Outputs:

- Analog
- Network
 - Ethernet
