T1 Digital Line Card

Optimize your PBX

The Interalia T1 Card provides XMU/XMU+ users with a reliable and modular source of high quality Call Processing, Auto Attendant, Audiotex and 1-800 ACD Call Routing.

The T1 line card is a great alternative to analog station ports for interactive menu applications. It requires less space in the PBX, supports line side T1 feature sets (PBX dependent), and decreases call transfer time.

T1 Features

- Digital interface for faster call setup
- Automated attendant menus
- " Transfer to targeted extensions
- ("Press 1 for Sales,
- Press 2 for Customer Service")
- " Transfer to an extension entered
- by the caller ("If you know the
- extension, dial it now")
- Call center routing (front-end ACD groups)
- Activate menus based on
- time-of-day or day-of-week
- Interactive audiotex and information hotlines
- Line side T1 feature sets (PBX dependent)
- Supports blind or supervised transfers
- PC interface to archive
- configurations and
- messages
- Future support for
- DNIS/ANI
- (PBX dependent)
